

Ornamental Fish from all over the world

Corydoras sp. aff. armatus

For the first time ever we were able to import another species of Corydoras. This species is for sure scientifically undescribed. It reminds one a bit on C. armatus due to the extremely long dorsal spine, but C. armatus never has the golden spot on the back which is present in our new species. The new species also originates from Amazonas state and was collected near Jutai.

Text & photos: Frank Schäfer

Maximum size	6-7 cm
Size available	6-7 cm
Origin	Brasilien / Brazil
